If the event occurs on a weekend or State holiday the time period for owner identification shall be extended 24 hours.

A physician who attends a person bitten by an animal known to be a potential carrier of rabies shall report the incident within 24 hours to the local health director. The report must include the name, age, and sex of the person.

(b) Confinement. - When an animal required to be vaccinated under this Part bites a person, the animal shall be immediately confined for 10 days in a place designated by the local health director. The local health director may authorize a dog trained and used by a law enforcement agency to be released from confinement to perform official duties upon submission

of proof that the dog has been vaccinated for rabies in compliance with this Part. After reviewing the circumstances of the particular case, the local health director may allow the owner to confine the animal on the owner's property. An owner who fails to confine an animal in accordance with the instructions of the local health director shall be guilty of a Class 2 misdemeanor. If the owner or the person who controls or possesses the animal that has bitten a person refuses to confine the animal as required by this subsection, the local health director may order seizure of the animal and its confinement for 10 days at the expense of the owner. When the local health director reasonably suspects that an animal required to be vaccinated under this Part has been exposed to the saliva or nervous tissue of a proven rabid animal or animal reasonably suspected of having rabies that is not available for laboratory diagnosis, the animal shall be considered to have been exposed to rabies. The recommendations and guidelines for rabies post-exposure management specified by the National Association of State Public Health Veterinarians in the most current edition of the Compendium of Animal Rabies Prevention and Control shall be the required control measures. (1935, c. 122, s. 14; 1953, c. 876, s. 10; 1983, c. 891, s. 2; 2000-163, s. 4; 2009-327, s. 12; 2017-106, s. 1.)

When an animal has been declared to be vicious and a menace to the public health, the local health director shall order the animal to be confined to its owner's property. However, the animal may be permitted to leave its owner's property when accompanied by a responsible adult and restrained on a leash. (1935, c. 122, s. 18; 1953, c. 876, s. 14; 1983, c. 891, s. 2.)

In determining whether a rabies emergency exists, the State Health Director shall consult with the Public Health Veterinarian and the State Agriculture Veterinarian and may

consult with any other source of veterinary expertise the State Health Director deems advisable. Upon finding that a rabies emergency exists in a county or district, the State Health Director shall petition the Executive Director of the Wildlife Resources Commission to develop a plan pursuant to G.S. 113-291.2(a1) to reduce the threat of rabies exposure to humans and domestic animals by foxes, raccoons, skunks, or bobcats in the county or district. Upon determination by the State Health Director that the rabies emergency no longer exists for a county or district, the State Health Director shall immediately notify the Executive Director of the Wildlife Resources Commission.
