

## National HIV Testing Day June 27, 2023

[National HIV Testing Day](#) (NHTD) is observed annually on June 27 and encourages people to [get tested for HIV](#), know their status, and get linked to care and treatment. On this day, we unite with partners, local health departments and other organizations to raise awareness about the importance of HIV testing and early diagnosis of HIV.

Share NHTD on your social media platforms to spark conversations about HIV and highlight progress being made to reduce HIV among all populations. Use the following hashtags: #HIVTestingDay, #NHTD and #StopHIVTogether leading up to NHTD and on the day of the observance, June 27. Follow and tag @NCDHHS on [Facebook](#), [Instagram](#), and [Twitter](#).

Want to know what’s happening in your community? See below for a list of NHTD free testing sites or you can [find a local free testing site nearby](#).
